# BBQube TempMaster Portable Startup Manual

## Home Screen

P1: Current Grill Temp    T: Target Temp  
P2: Food Temp            F: Fan Power %  
P3: Food Temp            ⏱: Timer Indicator

**P1:210    T :225**  
**P2:130    F :10**  
**P3:95    ⏱ 01:22**

Place TempMaster Portable on solid surface for blower fan clearance. It takes 30~45 minutes to stabilize grill temperature. Let the controller bring up temperature gradually.

## BBQ

1. Select "BBQ" from the Main Menu, and click to enter.
2. In the following set temp screen, rotate the dial to set target temperature, and click the dial to confirm .

**SET TEMP**  
**200**

3. Display will return to home screen with BBQ status showing. Fan will start after 60 seconds. Max fan power is limited to 70% on smaller grills.

## Click the Dial Knob to enter Main Menu

**>BBQ**  
**Manual Fan**  
**Set Alert**  
**Reset**

## To reset current running mode, select "Reset" from main menu
